

Satellite Phone Auxiliary Antenna

The IGSP99TP3 antenna was specifically designed for the Iridium frequency range. Magnetically mountable this antenna is the ideal auxiliary antenna to improve reception in mobile applications. The antenna come standard with a 3 metre cable tail and a TNC plug which should connect directly to your equipment or portable dock.

Specifications

Part Number	IGSP99TP3
Frequency Range	1620-1626.5 Mhz
Description	Wideband Patch Antenna
Gain	6dBic
Polarisation	RHCP
Axial Ratio	< 6dB
VSWR	< 1.5 : 1
Input Power	50 Watts Max
Connector Type	TNC Male Plug
Operating Temperature	-40 to + 85 Degrees C
Radome Material	Polypropylene UV Stable
Mounting Style	Magnetic Mounting
Cable Style & Type	LMR400-ULTRA Low Loss Side cable exit, 3 metres long
Size (max)	145.6mm Diam, Height 40mm
Weight	510 Grams
