

Global vehicle, aircraft, vessel and equipment tracking device

FasTracker offers a cost-effective, web-enabled method of tracking and monitoring mobile equipment in near real time, anywhere in the world

Capabilities:

- GPS position reporting from any location on land, at sea or in the air
- Instant delivery of 'I'm OK' and Panic alarms via email and SMS
- Programmable monitoring of speed, time traveled, ignition status and other parameters, with alerts delivered via email and SMS
- Geofencing to generate alerts for out-of-bounds, off course, time to arrival, tariff changes etc

Applications:

Mobile Asset Tracking

Ideal for temporary or permanent tracking of vehicles, vessels, aircraft or other mobile equipment. **Fastracker** can be permanently installed or supplied as a temporary tracking unit, using a 12 -24v socket power supply, making it ideal for hire fleets, aircraft ferries, vessel re-locations etc.
